

Chhavi Totla

AI Engineer & Full-Stack Developer

totlachhavi@gmail.com — +91 9099009413 — LinkedIn — GitHub — LeetCode

EDUCATION

- Sardar Vallabhbhai National Institute of Technology**
Bachelor of Technology – Chemical Engineering; CGPA: 7.85
- Aug 2023 – Present
Surat, India

SKILLS SUMMARY

- Languages:** Python, C++, C, JavaScript, TypeScript, SQL
- Frameworks & Libraries:** React.js, Next.js, FastAPI, Node.js, Express.js
- AI & Vector Tools:** LangChain, LangGraph, Pinecone, FAISS, Google Gemini
- Databases & Infra:** MongoDB, PostgreSQL, MySQL, Redis, Docker, Git
- Knowledge Areas:** DSA, OOP, DBMS, Operating Systems, Computer Networks

WORK EXPERIENCE

- Software Engineering Intern**
Solnce Energy
- Apr 2026 – Jun 2026
Surat, India
- Increased lead qualification efficiency by **94%** by architecting a **multi-agent conversational AI system** with **LangGraph** and **Gemini**, orchestrating **12 specialized nodes** across a supervisor-routed graph, deployed across **WhatsApp**, **web**, and **mobile app**.
 - Engineered a **hybrid RAG pipeline** with **Pinecone** (dense) + **BM25** (sparse) retrieval, reranking, and confidence-gated synthesis, hardened with **deterministic guardrails** and **rate limiting**, achieving a **0.96 composite score** and **100% scope-detection accuracy** across **LangSmith** evaluations.
 - Built **5+ full-stack admin panel pages** using **Next.js**, **Node.js**, **Express**, and **MySQL**, implementing secure REST APIs and database-integrated workflows.

PROJECTS

- ChefMate**
- GitHub | Live:
- Reduced meal-planning decision fatigue for **92% of 50+ users** by building a **full-stack AI meal planning system** with **FastAPI**, **Next.js**, **MongoDB**, and **FAISS**, leveraging **hybrid retrieval (deterministic filtering + semantic search)** for personalized, constraint-aware recipe recommendations.
 - Achieved **avg 800ms end-to-end latency** including live LLM inference by designing a **LangGraph-based agentic AI planning system** for meal optimization, incorporating nutrition scoring, pantry balancing, and iterative refinement.
 - Sustained a **100% request success rate** and **100% schema rejection rate** on malformed inputs by engineering a **production-grade AI pipeline** with **Pydantic + Zod validation**, **Redis-based rate limiting**, and **fallback-safe LLM orchestration**; **87% of users** reported improved organization and budgeting.
- PocketCafe**
- GitHub | Video:
- Built a **full-stack AI web platform** enabling secure authentication, protected routes, and persistent user-linked order storage with customizable coffee configurations, **increasing ordering likelihood by 80%** with **100% rejection rate** on unauthenticated requests.
 - Engineered a **4-stage RAG pipeline** (hybrid retrieval → allergy safety filter → relevance reranking → LLM synthesis) using **LangChain**, **FAISS**, and **Google Gemini**, achieving **avg 4.3s end-to-end latency** with **100% allergy-safe filtering accuracy**.
 - Implemented using **React 19**, **Node.js**, **Express**, **MongoDB**, and **Python** with **JWT authentication** and **bcrypt hashing**, enabling secure REST APIs and database-integrated order workflows.

ACHIEVEMENTS

- Smart India Hackathon 2025 — National Finalist:** Selected among the top teams nationally to compete in the final round of India’s largest government-led hackathon.
- LeetCode Contest Rating — 1648 (Top 17.5%):** Achieved a peak contest rating of 1648, ranking in the top 17.5% through consistent participation in competitive programming contests.
- Technical Writing — 2,500+ Impressions on Medium:** Authored techno-philosophical and technical articles bridging engineering depth with first-principles thinking.

STUDENT CHAPTERS AND CLUBS

- Executive Member, Association for Computing Machinery (ACM):** Spearheaded Hour of Code sessions across schools and classrooms, introducing 150+ students to programming fundamentals.
- Executive Member, Google Developer Student Club (GDGC):** Initiated and led 5+ workshops on web development (HTML/CSS, React) and machine learning basics.
- Career Mentorship:** Mentored 30+ chemical engineering students on building software careers from a non-CS branch, covering internship strategy, placement preparation, and skill roadmaps.
